A rustic sauna house with 2 separated saunas is ever prepared for you after your trips and activities. With our hospitality and the homelike accommodationunforgettable.

Possibilities of trips starting at Lappis Lodge

Sami village Soppero – stopover at the moosepark Vittangi

Our Samish friends Britt Marie and Per Nils welcome you at their home. A traditional reindeer farm in the middle of a Samish village. Most of the reindeers are outside during summertime, nevertheless some of them will be around at the home. The small Samish museum (all of Brides and Nils family) gives you a good impression about the Samish history. The traditional huts and accommodations make the idea of living perfect.

On the way home it is a must to stop at Lars and his moose in Vittangi. See the animals close to you and listen to Lars' stories - since 2005 two of those moose (today there are 6 now) stay at him, their names: Foppa and Fridolf.

Costs to expect for entries

Mineallin € 20/pers

Moosepark € 13/pers

Distance Lappis - Soppero approx. 100 km, Vittangi approx. 45 km on the way to Soppero

Kiruna and Jukkasjärvi - the world biggest iron ore cavern - production of ice at the Icehotel

The tour down to the mine is unforgettable. The possibility to visit a working underground mining is unique. The exposition and diashow give ideas of the life in the underground. The museum shows much about the 100 years of this mine. Daily at 9.00 there are guided tours in English. Worth to see is also the church of Kiruna. Constructed in the traditional kåta-style.... large ground and small top! Lately this church has been chosen as the most popular building in Sweden!

In Jukkasjärvi - a few kilometers from Kiruna - we find every winter the world famous Icehotel. How to get the ice and the construction of the hotel we will know after a visit to the Icehotel Production. A further visit is worthwhile to the church of Jukkasjärvi, the eldest wooden church of Lapland. The very eldest part is dated 1607, the new terrific investment/renovation 1997 – the organ.

Costs to expect for entries

Cavern € 30/pers

Icehotel € 10/pers

Churches free

Distance from Lappis approx. 70 km

Dundret in Gällivare – trip to the midnight sun

Midnight sun: a phenomenon to be seen only above the northern or below the southern arctic circles when the sun no more disappears below the horizon. Dundret the treeless mountain in Gällivare offers the perfect possibility to admire the midnight sun for a long time. Enjoy the vesper time/nightly hike on the large mountain – the sun at your back or face! Not far from Dundret, there is Malmberget with a little lovely museum (open-air) as well showing the history of the mining. Maybe you make a visit before the hike. No costs for entries

Distance from Lappis approx. 70 km

Fishing in the untouched of the Kalix River

Charged by the Mountain Rivers of the Swedish Fjell, the Kalix presents its most original and untouched character. Enormous dimensions of water scape the landscape after the junction Kalix and Kaitum and create a dream of a wild river amongst the very old forest. In the rapids move strong trouts. The population of greyling is good and after midsummer you may catch salmon.

Costs to expect

License € 5/pers

Equipment € 10/pers

Abisko/Björkliden - Nationalpark with Abiskocanyon and Lapporten

The Nationalpark Abisko is situated in the Swedish/Norwegian mountain borderland about 200 km north of the Polarcircle, on the shore of one of the largest lakes in Sweden (no 7) Torneträsk. Its name derives from the nearby village Abisko (Samish: Abeskovvu - sea-forest). As one of the 28 until today installed parks in Sweden Abisko has been placed under a preservation order already in 1909, so 77 square km. The highest mountains in the park are Slattatjahka 1191 m, Nuolja 1169 m.

One of the most important trails for long-distances, Kungsleden, starts in Abisko, passes south through the park to Hemavan. From Abisko appears Lappporten, the gate to Lapland and its landmark.

Many short and long hikes exist in the region. The breathtaking Abiskocanyon is reachable in 10 minutes walk from the Touristcenter. Naturium – Infocenter gives various interesting information concerning region and Nationalpark.

Center Sami Jokkmokk – Samish museum Ajtte

www.ajtte.com

Jokkmokk, just above the polar circle has always been the Samish center for business, meetings and festivals with friends from anywhere. Every year a big market takes place in February where the Samish offer their handicrafts. Here you find the big Fjäll and Samish museum. The history and culture of this country and these people in the strong conditions of the North are shown by many pictures, reportages and speeches. In Gällivare (on the way to Jokkmokk) you visit a gorgeous church and a nice old railway station. On the way it is worthwhile to stop in Porjus. There you may visit a [hydroelectric power station](#) or/and the beautiful photos of the nature taken by Patricia Cowen.

Costs to expect

Ajtte € 10/pers

Distance from Lappis approx 160 km

Nikkaluokta – Trailhead to the highest peak of Sweden and the beautiful Sami Chapel

The entrance to the Swedish mountains.....on the trail to Nikkaluokta, Kebnekaise 2104 m the highest peak of Sweden is to see. On the road there is a good chance to observe moose in the wild. Nikkaluokta itself is a lovely Samish locality and the trailhead to climb Kebnekaise. Since a long time Nikkaluokta is the native country of the Sami Tribe Sarri. Years ago this tribe lived exclusively with and from their reindeer herds. Today they as well rent blockhouses to tourist and run a cozy restaurant. Not fare away in the lovely Sami log chapel traditional marriages are still celebrated.
