

Fishing in Swedish Lapland

The last wilderness of Europe

Only one hour's drive south of Kiruna you will find Lappeasuando Lodge by the head of the legendary river Kalix. Coming from the mountain streams of the Swedish Fjälls, Kalix appears in the original and intact character. Enormous dimensions of water build the land below the junction and form a dream of a frenetic stream amongst the aged forest. In the rapids you will find strong trouts, a good stock of graylings and after midsummer it is possible to catch salmon. Numerous lakes in the close surroundings where you catch heavy luces. Do to the nearby rivers Torne and Lainio this fishing area is absolutely varied. Would you like anything else?
